Internship Offer Letter

Student Name	: YASH BIWARE
Stream	: B.Tech
Branch	: B.Tech(Computer Science and Engineering)
Institute Name	: Medi-Caps University
Internship Domain	: Palo Alto Cybersecurity
Internship Duration	: June 2026 - August 2026
AICTE Student ID	: 17353430231

We are pleased to inform you that you have been selected for the 8-Week **AICTE – EduSkills Virtual Internship Program**.

During this internship, you will learn and demonstrate industry-relevant skills that will enhance your employability and strengthen your confidence in the subject area.

The program is designed to provide structured learning combined with practical exposure.

Internship Structure & Evaluation:

- The internship will follow a **week-wise structured learning plan**.
- You will be required to complete **weekly assessments** to track your progress and understanding.
- Certain modules will require submission of **project documentation and assignments**.
- In the final week, you must appear for a **Final Assessment Test**.
- The final grade will be based on your overall performance, including weekly assessments, project submissions, and the final test.

Upon successful completion of all required steps and assessments, you will be awarded a **Virtual Internship Certificate**.

Please note that this offer letter will be considered valid only after the successful completion of the internship program and fulfillment of all assessment requirements, including obtaining the final completion certificate. Without the final completion certificate, this offer letter shall not be treated as a valid document for any official purpose.

The week wise Structure of the Internship is as Follows:

Week	Module	Description
Week 1	Cybersecurity Fundamentals	Cybersecurity landscape involves cyberthreats like malware, phishing, DDoS, insider attacks, zero-day exploits, SQL injection, ransomware, and botnets.
Week 2	Cybersecurity Fundamentals	Security models define rules and frameworks to protect data, while a security operating platform provides integrated tools.
Week 3	Network Security Fundamentals	Networking and addressing enable communication while endpoint security protects devices from threats.
Week 4	Network Security Fundamentals	Network security tools monitor and control traffic, preventing cyberattacks and ensuring secure operations.
Week 5	Cybersecurity Fundamentals	Cloud security fundamentals include operations, application protection, and cloud-native monitoring.
Week 6	Security Operations Fundamentals	Infrastructure management, automation, and endpoint protection secure systems from threats.
Week 7	Security Operations Fundamentals	Threat intelligence platforms detect, analyze, and respond to cyber threats.
Week 8	Elements of Security Operations	Security orchestration automates and streamlines threat response and incident management.

Note: There is no stipend associated with this internship.

We congratulate you on your selection and wish you a successful learning journey.
